

# LinkUp® Enterprise Accounts Payable

The Accounts Payable function in many organizations today uses inefficient, expensive preprinted check that must be stored under lock and key and usually require specific software, paper and printers. Companies incur significant costs in printing and mailing timely payments to vendors and creditors.

Today, the most advanced companies have found that, by electronically creating, storing, scheduling and printing checks and other documents through Standard Register's LinkUp® Enterprise solution they can realize a significant return on their investment.

## Documentation Challenge

Old-fashioned Accounts Payable procedures leave companies vulnerable to fraud, cost-inefficiencies, and errors. Credit ratings can be compromised as companies juggle hundreds of accounts in an effort to manually schedule payments and mail dates.

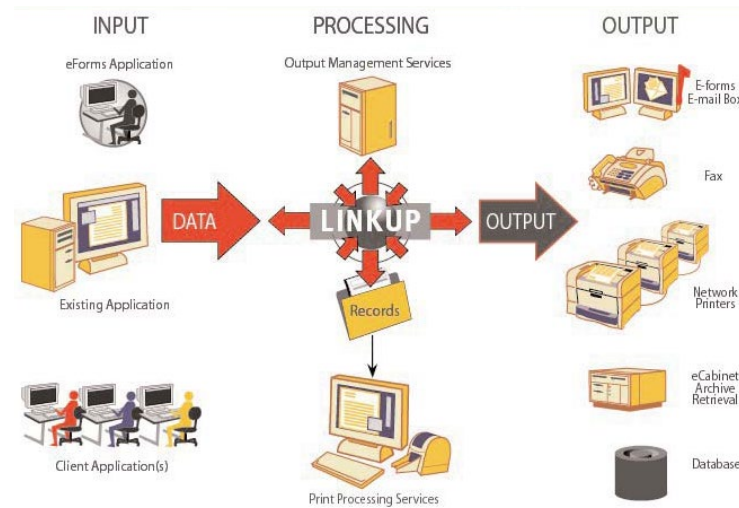

## Reduce Opportunity for Fraud

With LinkUp, the risk of fraud is virtually eliminated. LinkUp provides secure graphic fonts, signature controls, encryption, direct deposit and other features—and eliminates the need to store preprinted check stock.

Besides simplifying the payroll function, LinkUp enterprise can help you automate all of your documents and processes. Standard Register has built accounting and risk management functions into the system so your company can maintain a secure database that is linked throughout the corporation.

## Achieve New Cost Efficiencies

LinkUp Enterprise provides a single, secure platform that gives you a means to produce secure, negotiable documents on blank paper stock without software modifications to existing applications. The result is greater efficiency, improved accuracy, less risk and reduced costs.

### Start Saving Your Company Time and Money

From typical Payroll and A/P applications to a wide range of forms and tax documents, LinkUp can address your company's typical document needs simply and efficiently.

## A Single, Secure Document Solution

LinkUp® Enterprise improves efficiencies while managing risk. LinkUp® offers a streamlined process that:

- Eliminates the cost of preprinted checks and related equipment
- Reduces the risk of fraud through secure fonts, encryption and other measures
- Optimizes timely payment
- Reduces check errors
- Saves time by printing from multiple accounts in one check run
- Eliminates the need for check storage and special printers

# LinkUp® Enterprise Payroll

In many organizations today, the payroll process is a labor-intensive, costly, multi-step procedure. Inefficient, expensive preprinted forms are used at specific HR workstations, typically with little concern for workflow. Companies incur significant costs in printing, stocking and mailing payroll checks and other employment forms.

Today, the most advanced companies have found that by using the secure technologies of LinkUp Enterprise, they can create, store and print checks and forms electronically, and merge data files at print time to realize a significant return on their investment while managing documentation risks.

## Documentation Challenge

Confidential information and integrity can even be compromised as workers shuffle through a myriad of work applications, insurance forms and tax documents. Human resources must wade through a stringent documentation process that leaves less time for attention to individual HR matters. In short, outdated payroll procedures leave companies vulnerable to risk, cost inefficiencies, and compliance issues.

## Enhance Service and Reduce Fraud with a Single, Secure Document Solution

LinkUp Enterprise provides secure graphic fonts, signature controls, encryption, direct deposit, positive pay and other unique features that increase security while optimizing the payroll process.

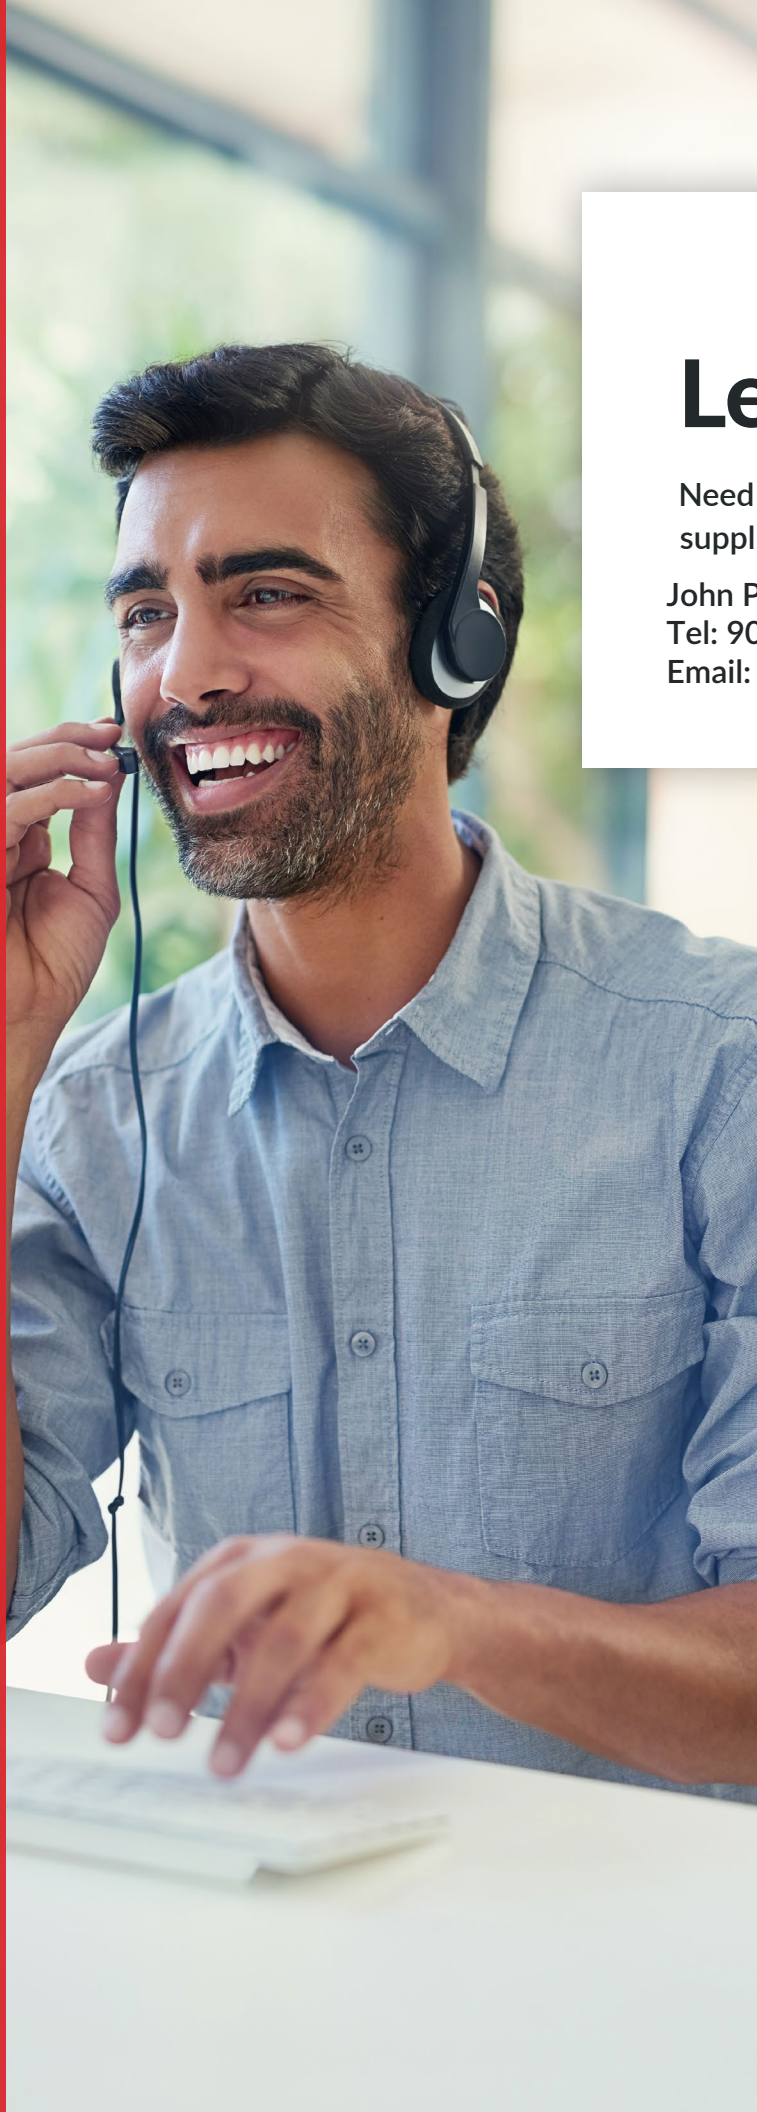

LinkUp Enterprise offers a streamlined solution that:

- Eliminates the cost and storage requirements of preprinted check stock, special printers and related equipment
- Reduces the risk of fraud
- Optimizes timely payments
- Reduces check errors
- Enhances pay stub information
- Saves time by printing from multiple accounts in one check run

## Achieve New Cost Efficiencies

LinkUp Enterprise provides a single, secure platform that gives you a means to produce secure, negotiable documents on blank paper stock without software modifications to existing applications. LinkUp Enterprise also lowers distribution costs by enabling you to print disbursements at remote locations. The result is greater efficiency, improved accuracy, less risk and reduced costs.
