

TE1916 Batch Encoder

Introducing the Encoder with a Whole Batch of New Benefits.

With Standard Register's innovative TE1916 batch encoder, you can print the highest quality MICR lines on checks faster and easier than ever before, while totaling and sorting more precisely and productively. An improved LCD display, versatile keypad and more user-friendly loading features reduce errors and increase throughput. Microprocessor controls alert operators to miskeys, mutilated documents, ribbon problems and other malfunctions so time and labor aren't wasted. And multi-function keys put a variety of custom-encoding options and upgrades at your fingertips.

Retailers: Stop Dollars From Floating Through Your Fingers.

The TE1916 allows retailers to quickly, accurately encode customer checks—then generate batch tickets and deposit slips—on site. So, they can take advantage of per item discounts, extend cut-off time for deposits, and improve cash flow by making more income available on

the day it's received. The savings in bank fees are considerable.

Financial Institutions: Keep Tellers and Deposits on Track.

By automating deposit preparation, the TE1916 makes document process-

ing more efficient and cost-effective for your financial institution. Because the TE1916 tracks checks by teller and by batch, you can proof individual teller totals throughout the day by number of checks en-

coded, amounts of each check, batch and grand totals. You reduce end-of-day out-of-balance conditions and overtime costs while assisting employees in preparing fully qualified deposits, ready for the reader/sorter.

Specifications

- Color: Gray
- Weight: 16 lbs.
- Height: 7"
- Width: 12"
- Depth: 15"
- Power: 120V, 1 Amp.
- Ribbon: Cartridge capacity 65,000
MICR character average
250,000 lister character average
- Font: E13B MICR
- Print Speed: 20 characters per second

Optional Features

- check digit verification and generation
- serial numbering
- floating on-us and/or batch recall

Nationwide Service
