

WIDMER AUTOMATIC NUMBER, DATE, AND TIME STAMP MODEL 776-LED

Dual Printing Heads
Precise Timing
Accurate Numbering
Heavy Penetration
Lasting Performance

This modern number, date and time stamp features a distinct two-tone light and dark gray finish that will compliment the décor of any office. The digital time display can be synchronized with the print mechanism.

This recorder is versatile and unique as it offers two printing heads that will enable numerous combinations of Time, Number and Dating, also Alpha Wheels for coding, a combined total of 22 wheels.

Our conventional printing head has 6 wheels. Consecutive action will advance with each stamping. Available with either consecutive, duplicate, triplicate or quadruplicate action (but not a combination of these) - any combination of number, letter and dash wheels up to 11 wheels per head. Can be furnished with repeat switch or external number advanced switch. Guide platforms available for special print locations.

Insertion of the paper activates the trigger for split second stamping. A new, open throat allows greater accessibility; documents of letter size or small tickets may be inserted with ease.

The printing location can be adjusted to allow a selection of imprint locations. Another important feature – the stamping blow can be increased to penetrate carbonized forms, and pressure sensitive carbon less forms.

Timing heads in addition to our conventional Year, Month, Date, AM/PM Hours and Minutes are also available in many other forms such as Military Time 00 to 2300 Hours, Half Minute, Tenth Hour or reverse print.

Model 776 available without Digital Display.

2001 JAN -0 A 12: 16 000033

Not actual size of imprint (reduced)
