

WIDMER ELECTRONIC

NUMBER AND DATE MACHINES

- Instant Operation
- Lasting Performance
- Elegant Appearance
- Accurate Numbering
- Penetrates Forms
- Quality Impressions

Mfg.
Hackensack, NJ
USA

A very fast and efficient method of numbering and dating invoices, purchase orders and documents of all types. Eliminates the need for pre-numbered forms, and is a versatile and economical way to control your paperwork flow.

The insertion of the paper activates the trigger for split second stamping. A new, open throat allows greater accessibility; documents of letter size or small tickets may be inserted with ease.

The printing location can be adjusted to allow a selection of imprint locations. Another important feature – the stamping blow can be increased to penetrate carbonized forms, also pressure sensitive carbonless forms.

TO OPERATE

Simply plug into an ordinary 110 volt AC circuit. The numbers will advance automatically with each impression as well as the automatic ribbon.

Full size sample impression Model N-3

000009 JA-5 01

Full size sample impression Model ND-3

MODEL N-3

Our conventional printing head has 6 wheels. Consecutive action will advance with each stamping. Available with either consecutive, duplicate, triplicate or quadruplicate action (but not a combination of these) — any combination of number, letter and dash wheels up to 11 wheels. (Wheels in excess of 6 must be advanced manually). Can be furnished with repeat switch and guide platforms available for special print locations.

MODEL ND-3

Has 6 digit consecutive action number plus a manually set month, date and year in addition to the features of the Model N-3 described above.

OCR type font (10 pitch USA Standard A) can also be furnished for special applications

Specifications: 7 1/4"(18.4cm), height, 6 1/4" width, 10 depth.
Shipping Weight 18 lbs, 8.2 Kg.
Total Engraving Area 1 7/8"(4.6 cm) wide x 1 7/8" (4.6) high.
